PROFESSIONAL SUMMARY

Motivated Java Full-Stack Developer Trainee with hands-on experience in Core Java, SQL, React.js, and RESTful API testing. Proven ability to build responsive, user-centric web applications using HTML5, CSS3, and JavaScript. Completed a full-stack food delivery platform with secure authentication, payment integration, AI chatbot, and admin dashboard. Currently pursuing Java Full-Stack Developer Certification at NIIT (2025–2026). Experienced in Agile workflows, Git version control, and API testing with Postman. Career transitioned from Mechanical Engineering driven by a passion for software development. Seeking an entry-level software engineer role to deliver scalable code and grow within an innovative team.

CORE SKILLS

Languages:	Core Java, SQL, JavaScript, HTML5, CSS3
Frameworks:	React.js, Spring Boot (fundamentals), REST Assured
Testing & QA:	REST API Testing, Microservices Testing, Functional Testing
Web Dev:	Responsive Design, DOM Manipulation, Full-Stack Web Apps
Tools:	Git, VS Code, Postman, MySQL
Soft Skills:	Agile Teamwork, Problem Solving, Technical Communication, Fast Learner

KEY PROJECTS

Food Delivery Web App *(Full-Stack Platform)*

Tech Stack: React.js, Core Java, Spring Boot, MySQL, JWT, REST API | Team Size: 4 | Role: Full-Stack Developer

- Developed a full-stack food delivery platform featuring secure JWT authentication, payment gateway integration, AI chatbot support, and an admin dashboard for order management.
- Built a responsive React.js frontend with dynamic routing, cart management, and real-time order status updates to deliver seamless UI/UX across devices.
- Designed and implemented RESTful APIs for user auth, menu management, and order processing; validated endpoints using Postman and REST Assured.
- Collaborated in an Agile 4-member team using Git for version control, following modular coding practices and regular code reviews.

Responsive Food Delivery UI Clone *(Zomato-Inspired Frontend)*

Tech Stack: HTML5, CSS3, JavaScript | Team Size: 4 | Role: Frontend Developer

- Designed a pixel-accurate, responsive food delivery interface compatible across mobile, tablet, and desktop using HTML5 and CSS3 grid/flexbox layouts.
- Implemented interactive JavaScript features including dynamic content rendering, navigation bar behavior, and video thumbnail sections.
- Optimized asset structure and CSS to improve page load performance and rendering responsiveness.
- Delivered the project following clean, modular coding practices within a collaborative 4-member team environment.

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Jawaharlal Nehru National College of Engineering | 2020 – 2024 | Score: 73%

CERTIFICATIONS & TRAINING

Java Full-Stack Developer Certification — *In Progress*

NIIT Institute | August 2025 – August 2026

Coursework: Core Java OOP · SQL Database Design · React.js Front-End Development · REST API Architecture · Microservices Testing · Full-Stack Web Application Development · Generative AI fundamentals

KEY STRENGTHS

- ▶ Completed end-to-end full-stack application with production-grade features (auth, payments, AI chatbot) as a fresher trainee.
- ▶ Hands-on experience with REST API testing tools (Postman, REST Assured) — strong QA/API tester candidate.
- ▶ Cross-disciplinary problem solver: Engineering background combined with modern software development skills.
- ▶ Active GitHub presence and deployed portfolio demonstrating practical coding output.
